

# Financial need essay for college

## Introduction

As a prospective college student, I am excited to pursue my academic goals and advance my knowledge and skills in my desired field. However, my ability to achieve these goals is dependent on my financial situation. Unfortunately, my family is facing financial hardship, which makes it difficult for me to pay for my college education. In this essay, I will explain my financial need and how I plan to finance my college education.

## Financial Need

My family's financial situation has been challenging due to a recent job loss and unexpected medical expenses. As a result, our household income has significantly decreased, and we are struggling to meet our basic needs. Unfortunately, this situation has also affected my ability to pay for college.

Without financial assistance, I may not be able to attend college and achieve my academic goals. I am committed to pursuing my education and contributing to society, but I need financial support to make it happen.

## Plan to Finance College Education

To finance my college education, I plan to apply for financial aid and scholarships. I have researched several scholarships and grants that I may be eligible for, and I will submit applications to those programs. I will also fill out the Free Application for Federal Student Aid (FAFSA) to determine my eligibility for federal and state financial aid programs.

In addition, I plan to work part-time while attending college to contribute to my education expenses. I have experience working in customer service and retail, and I am confident that I can find a job that fits my schedule and provides the necessary income to help cover my education costs.

## Conclusion

In conclusion, my financial need for college is significant, and I am relying on financial assistance to achieve my academic goals. I am committed to pursuing my education and contributing to society, but I need financial support to make it happen. I plan to apply for scholarships and grants, fill out the FAFSA, and work part-time while attending college to finance my education. I appreciate any financial support that can be provided to help me achieve my academic goals.
